SEE IIST
South East European International Institute for Sustainable Technologies

A LARGE-SCALE COMPETITIVE RESEARCH FACILITY

South East European International Institute for Sustainable Technologies (SEEIIST)

http://seeiist.eu

- develop a regional center of excellence in South East Europe
- support socio-economic development
- decrease or even reverse brain drain

Core of SEEIIST: a state-of-the-art 'Facility for Tumour Therapy and Biomedical Research with Protons and Heavier Ions'

SCIENCE FOR DIPLOMACY
SCIENCE FOR SOCIETY

South-East European International Institute for Sustainable Technologies (SEEIIST) in the spirit of "Science for Peace"

First official support of such an initiative by the Government of Montenegro in March 2017, following the original proposal by Prof. Herwig Schoppper, former Director General of CERN

Positive reception by a number of organizations and institutions

Summary of the main mission of the SEEIST Project

- Science for Diplomacy
- Scientific Excellence
- International Collaboration
- Sustainable development of society
- Improving health of citizens
- Accelerating knowledge and innovation
- Knowledge based Economy
- Reversal of brain drain

Important first political step: Declaration of Intent signed at CERN on October 25, 2017

Signed by eight parties:
Albania, Bosnia and Herzegovina, Bulgaria, Kosovo*, The FYR of Macedonia, Montenegro, Serbia and Slovenia.
Croatia agreed "ad referendum", Greece is presently an observer.

SEEIIST Initiative transformed into a Regional Project

SEE Ministers of Science / Corresponding Ministers or their representatives at CERN

Candidate Members for the South-East European International Institute for Sustainable Technologies

Republic of Albania
Bosnia and Herzegovina
Republic of Bulgaria
Republic of Croatia
Hellenic Republic
Kosovo*
FYR of Macedonia
Montenegro
Republic of Serbia
Republic of Slovenia

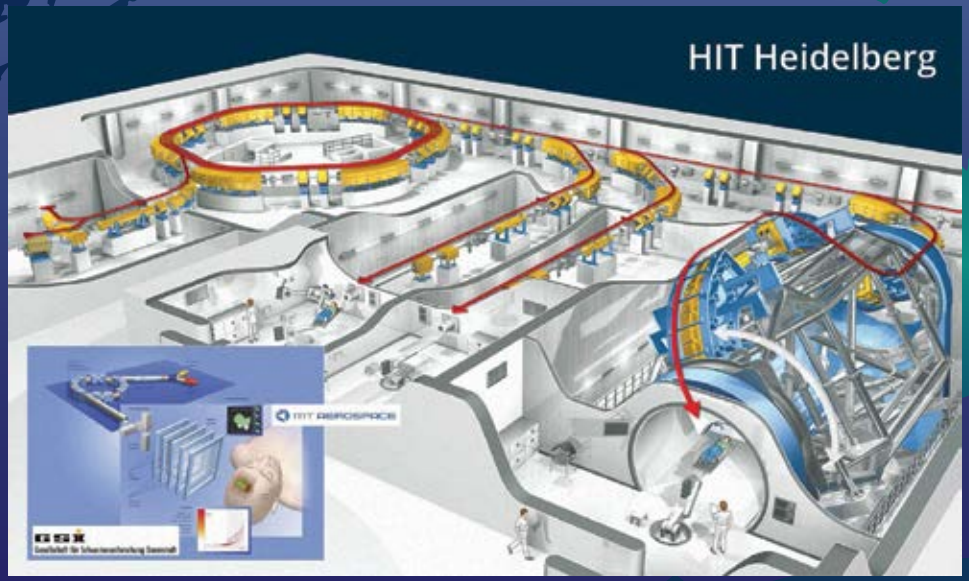
Signed a Declaration of Intent
Agreed "ad referendum"
Observer

* This designation is without prejudice to positions on status and is in line with UNSC 1244/1999 and the ICJ opinion on the Kosovo Declaration of Independence

Facility for Tumour Therapy and Biomedical Research with Protons and Heavier Ions

Virtual center, source http://enlight.web.cern.ch/media

About 500 patients per year to be treated as needed for a population of 20M. In parallel, 50% of the beam time dedicated to biomedical research with multi-ion sources beyond presently used proton and carbon-ions, making the SEEIIST project unique in the world. Capacity for about 1000 researchers, including a major number from outside the SEE region.



Particle therapy centers in Europe
Big hole in South East Europe

Major milestone in January 2018

Forum held at the ICTP/Trieste under the auspices UNESCO, IAEA and EPS

- More that 100 participants
- Representatives from the EC, ESFRI, IAEA, EPS, RCC, CERN, FAIR-GSI, HIT, CNAO, DESY, SESAME.... including 40 Users from the Region

Central goal of the Forum: Scientific Concept Study for the Institute presented for the time to the public

Executive Summary of the Concept Study prepared for the Forum

Main elements of a Business Plan:

- technical parameters of thefacilities
- time schedule
- investment costs
- operation costs

Concept Study published (seeiist.eu)

Important further Political step Formation of an Intergovernmental Steering Committee

1st Meeting January 2018, Sofia

- Election of Chairperson: Dr. S. Damjanovic, Minister of Science of Montenegro

2nd Meeting March 2018, Tirana

- Project selection: Facility for Tumour Therapy and Biomedical Research with Protons and Heavier Ions; Draft Memorandum of Cooperation approved

3rd Meeting July 2018, Skopje

- Distribution of tasks for the next Preparatory Phase of the Project

4th Meeting November 2018, IAEA, Vienna

- Coordinator of the Preparatory Group elected

Important support for the SEEIIST Design Study Phase

European Commission – Directorate General for Research and Innovation (EC DG-RTD)

- First direct financial support of 1 MEUR for the SEEIIST Design Study Phase

CERN – European Organization for Nuclear Research

- To host the Working Group 1 – Accelerator Design – part of the SEEIIST Design Study Phase
- Great benefit from long experience in the design of medical accelerators

GSI-FAIR – Facility for Antiproton and Ion Research

- To host the Working Group 2 – R&D and Scientific Aspects of the SEEIIST Design Study Phase
- Great benefit from long experience in Bio- and Medical Physics

IAEA – International Atomic Energy Agency

- Support by the IAEA for the Capacity building program

Setting up the Preparatory Group for the SEEIIST Design Study Phase

Overall Responsibility: SEEIIST Steering Committee

Overall coordinator of the Preparatory Group Dr. Horst Wenninger

- Working Group 1 Accelerator Design at CERN
- Working Group 2 R&D/Scientific Aspects at FAIR-GSI
- Working Group 3 Legal Aspects + Business Plan SEEIIST SC

No matter where SEEIIST will be located – National Benefits across the whole Region –

Treatment of patients: all participating countries will have their share for treatment of patients

Involving the local industry: the construction of the Facility would require more than 200 companies. The production of many different components can preferentially be assigned to our local industry.

Powerful digital networks and big data handling - to reach the clinical and scientific goals two Networks will be set up, a **Clinical Network** and a **Scientific Network**, to be located in different parts of the region.

Training for building human resource capacities in many European renown institutions – all countries involved (funding from IAEA; EU H2020: COST, MC ITN; IPA2019 - financing volume 0.5/0.3/4.5/2 MEUR)

Time line of the SEEIIST Project

For SEEIIST up to 200 MEUR required, guaranteeing competitivity in Europe. Multiple sources of financing necessary: EU Structural and cohesion funds, IPA funds, some contributions from member-states, other funds. We also hope for the support by he Berlin Process.

2017-2018
Concept Study

2019
• Start of the Design Study Phase at CERN
• Set-up of a legal entity

2020
• Selection of the site
• Application for the ESFRI Road Map

2022
Start construction of the Facility

2027
First patient treatments
